This past June, the Conyngham Valley dental team of Shandrick Dental Care Studios, attended a week of training in patient care and practice development, at the premier post-graduate teaching center, The Las Vegas Institute for Advanced Dental Studies (LVI) in Nevada. Dr. Robert Shandrick, and team members Jayme Zola, Kerry Kerak RDH, Adrienne Deturo and Carol Palko, studied with LVI course directors, Drs. Matt Bynum and Art Mowrey, and world renown founder of LVI, Dr. William Dickerson.

The Shandrick dental team spent time with Drs. Bynum and Mowrey and "their" team members, who have two of the most successful patient- service oriented, LVI- style practices in the country. Study included providing patients with optimal and comprehensive care, creating a positive and inviting atmosphere for patients and team, improving verbal communications in offering patients the best and delivering it, as well as utilizing the latest technology in discovering and discussing patient needs.

Attending this energetic, interactive, and highly motivational seminar, exemplifies the commitment Shandrick Dental Care Studios has made, to provide their patients the very best care they deserve.
